Challenge

A researcher was searching for 1000+ FFPE blocks of squamous NSCC. Sample requirements included being stages 1-3A, less than 5 years old and having treatment history exclusions.

Scientist.com Solution

Scientist.com's support team aided the researcher in contacting 28 suppliers. Within this group of suppliers, 7 SOWs were submitted, and 4 suppliers were selected. 300 FFPEs donated from 5 different countries with no overlap were selected, ranging in price from \$300-\$1000 per block.

Samples matching all requirements were quickly identified from ethical sources

Centralized communications and sample data made it easy to identify the best samples for the project

"...one request for all the supplier management, a very smooth system."
