Biomarkers Case Studies

Identify Suppliers for Custom Biomarker Projects

 Find suppliers who can fulfill whole genome sequencing and off-target analysis

Challenge

A researcher needed to identify suppliers who could perform whole genome sequencing on multiple DNA samples from a genetically modified cell line followed by global off-target analysis.

Scientist.com Solution

Working with Scientist.com, the researcher was able to contact multiple suppliers and proceeded to evaluate quotes from **4 suppliers**. The researcher selected a supplier to partner with for their custom project and **saved 67% in comparison with other quotes**.

 Researcher was able to compare and contrast quotes from multiple suppliers

 67% in cost savings by comparing 4 competitive quotes

Save Time and Money on Custom Biomarker Projects

 Identify suppliers who can fulfill membrane protein expression and purification on time and on budget

Challenge

A researcher was searching for suppliers who could express and purify a protein located in Golgi/ER membranes using a new technique listed in the literature.

Scientist.com Solution

Using Scientist.com to identify suppliers, the researcher was able to evaluate quotes and timelines from **4 suppliers** for the needed service. The researcher selected a supplier to partner with for their custom project who **saved them ~2 mo. in time and 70% in costs.**

Researcher chose a supplier who could perform the work ~2 mo. faster than the highest quote

Researcher found a cost savings of 70% by comparing 4 competitive quotes
